- Can be carried forward and offset against future taxable income subject to local tax rules and limitations
- Brazil is the only country with a specific restriction brought forward tax losses can only be offset against 30% of taxable income per year
- Tax authorities in the countries we operate could challenge these tax losses significantly, reducing their availability in future periods
- Luxembourg tax losses mainly relate to those recognised in the Luxembourg parent company pre-IPO
- To use future Luxembourg tax losses, they need to be certain post review by the tax authority and then Lux operational income is needed
- Given the holding entities have no operational business and limited income in Luxembourg, GFG unlikely to have options for utilisation
